Information Disclosure Statement

1. The information disclosure statement filed 3-21-05 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Applicant's argument that the references should be considered because they were cited in EPO search report is not persuasive. Applicants did not supply the search report at the time of the submission. Merely stating the references are relevant without disclosing whether they are x, y or a references and supplying the search report is not considered sufficient disclosure.

Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 12 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaw (5,900,382) for reasons of record.

Claim 12 has been amended to include colloidal silica binder. Shaw teaches a silica sol which is a colloidal silica. The rejection is maintained. Shaw further clearly teaches casting of the refractory thus meeting the limitations of claim 21. It should be noted that claims 16-18 depend upon claim 13. Because the composition of claim 13 was considered to be allowable the claims that depend upon this claim is also considered allowable.

4. Claims 12 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Schulz (4,212,680), for reasons of record.

Schulz clearly teaches a colloidal silica binder. Refractory shapes are also formed meeting the limitation of claim 21, see column 1, lines 7-14.

5. Claims 12 and 21 are rejected under 35 U.S.C. 102(a or e) as being anticipated by Guigonis et al (2004/0266604), for reasons of record.

Guigonis et al teach fumed silica (colloidal). Shaping is also included such as pumping, paragraph [0065].

Allowable Subject Matter

6. Claims 1-3,5-8,10,11 and 20 are allowed.

Art Unit: 1755

7. Claims 13-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to teach or fairly suggest the claimed ratio of constituents.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
